

About our Awards...

Corporate Vision is dedicated to working around the clock to shine a spotlight on the brightest, best performing and most deserving companies and individuals from around the business world.

We're fiercely passionate about recognising outstanding achievement, game-changing innovation and stellar performance, and all of our awards are carefully tailored to provide detailed and in-depth analysis of the very best each market, industry, sector and region has to offer.

We take choosing our winners very seriously and every single one is chosen on merit. As we said, we're only interested in recognising the very best so, no matter how big a business is, nobody can buy their way to success

How are Winners Chosen?

Our winners are decided by a combination of votes gathered from our network of respected industry partners and our own rigorous in-house research, performed by our dedicated network of industry insiders and corporate specialists.

Each award is carefully scrutinised, from a nominee's region to their performance over the past 12 months, their commitment to innovation, their methods and even their competition to ensure that only the most deserving firms walk away with one of our prestigious trophies.

Of course, it's no use winning an award if you can't shout about it, which is why we're also committed to working with all of our nominees and winners to promote their success throughout their industry and beyond and making sure they gain maximum exposure and really benefit from their win.

Global energy is perhaps the most important issue we face in today's society. An emphasis on renewable and energy-efficient solutions and technology now pave a way for the future generations to express the need for cleaner and safer energy. The Energy Innovator Awards aim to showcase and celebrate the tenacity and determination of the leading companies and individuals who strive for excellence in this important and evolving sector.

With the need to reduce carbon emissions and discussions of climate change swirling, the dedicated businesses and professionals operating in the field of power generation, transport and distribution are facing new challenges at an exponential rate. Therefore, it seems imperative to the organisers of the Energy Innovator Awards that these companies and individuals are not just recognised for their dedication, but also rewarded for their hard work and commitment to the sector.

From engineering and manufacturing, to those who provide cutting-edge renewable solutions and sustainable technologies, we look to recognise all companies who fall within the spectrums of power and energy. Regardless

of your company's size, reach or location, our Awards will serve as the perfect platform for you to receive an endorsement for achievements and goals attained.

Achieving success in the Energy Innovator Awards will provide you with the evidence you need to prove, beyond doubt, that you stand apart from the competition. Enhancing your victory with visual reminders, allow for the promotion of your brand to extend even further, which in turn can attract new employees, looking to work for the best, and new clients and customers who are looking to work with those who provide only the best services.

With award categories covering the main sectors with the energy industry, as well as sub-categories to focus on specific specialisms and even specific achievements for individuals excelling in the industry, our award programme is the perfect way to commemorate the momentous developments undergone by your business, enterprise or initiative.

We employ a merit-driven process to ensure that only the very best are selected for one of our prestigious awards. Those included in on our shortlist are invited and encouraged to provide supporting information to reinforce their position as an industry pioneer, which is also supported by research by our experienced and dedicated in-house team. Our in-house judges will assess and scrutinize the shortlist, ensuring that only the most deserving receive one of our industry renowned accolades.
