

Hi

Shortlisting has recently launched for the **2019 Energy Innovator Awards** and I am delighted to inform you that keppe motor has been highlighted by CV Magazine as a potential nominee this year!

Global energy is perhaps the most important issue we face in society today. An emphasis on renewable and energy-efficient solutions now pave a way for the future generations to express the need for cleaner and safer energy.

The 2019 Energy Innovator Awards will celebrate the tenacity and innovation of the pioneers operating within this evolving sector, and with six set categories available we look to encompass and recognise the best this industry has to offer.

The categories are as follows:

- **Renewables & Environment**
- **Utilities**
- **Oil & Energy**
- **Mining & Metals**
- **Environmental Services**
- **Chemicals**

Following an extensive in-house research process designed to identify leading enterprises and individuals within the energy sector, I am delighted to confirm that keppe motor has been highlighted as a potential nominee within the category of **Renewables & Environment**.

Our ambition is to recognise those who play a major role in changing the worldwide energy landscape with innovative and clean energy solutions. With a demand for better and sustainable energy sources,

our team have looked to pinpoint those who are providing the very best services to customers and clients.

Accept Nomination

Should you wish to proceed further then you will be encouraged to provide information to reinforce your nomination, and our in-house research team will begin to build a comprehensive case-file on your behalf. There are no mandatory costs involved with accepting a nomination or receiving an award.
